

Dear,

We are pleased to announce the purchase by Persico S.p.A. of all industrial rights of the company Terenzio s.r.l.

The acquisition includes all Terenzio trademarks, patents, technical drawings, new developments and includes also all production and marketing rights of Terenzio products and of the related technologies and know-how.

Persico then becomes the exclusive holder of Terenzio's industrial rights and is therefore the only company that can legitimately develop, produce, market and sell Terenzio products or products however arising from the technology and know-how of Terenzio.

Terenzio employees are hired by Persico and they join the approximately 300 current Persico employees in order to ensure continuity and further developments to well-known and reliable Terenzio products.

Persico Company was founded in 1976; it works in different fields and with 4 different Business Units: Automotive, Rotational, Nautical and Engineering. Actually it furnishes worldwide approximately 40 million Euros per year in moulds and about 20 million Euros per year in equipments.

Terenzio, in its 74 years of experience, has manufactured 3,450 presses for composites and heat-hardeners, compression and injection rubber presses, plus special customised presses such as:

- . KOMPO® presses 300-3000 tons for composites (SMC, GMT, LFT) equipped with the active parallelism control PLANAR®
- . ROBOMATIC®, ROBOTER and POLYEDRA® presses for the moulding of toilet seats in urea.
- . POLYMATIC presses for automatic moulding of particulars in urea (such as components for electrical wall plugs).
- . OPERA horizontal and vertical presses for rubber items injection moulding.
- . RUB compression presses for rubber items moulding, even by vacuum moulding.
- . HS special presses (maxi-press, double-press, single press) for heat-shields production.
- . PA presses for aeronautical industry items.
- . STRATO presses for the production of rubber sheets and carpets
- . PTFE presses for PTFE sheets

Thanks to the joining of the two companies resources and know-how, a continuity will be given to Technical Assistance, Production and Products Innovation and Presses Terenzio, integrating them, where possible, with Moulds and Automation by Persico.

If you need information concerning Terenzio projects, technical assistance and spare parts, please contact:
