ROTOMOULDING - SMC/ CARBON SMC - RTM/HP RTM - GMT/LFT/LWRT
PCM - AUTOCLAVE STEEL OPEN TOOLS - BLOW MOULDING

The world of plastic components for **AGRICULTURE, CONSTRUCTION, BUSES&TRUCKS** and **RAILWAYS** equipment is entering a new epoch.

Now the features that make a difference to customers are:

- Lightness - vehicles that use less fuel.
- Aesthetics - better-looking vehicles.
- Mechanical stress resistance - safer vehicles.

Persico Industrial is ready to meet all these customer needs. What makes us different? First and foremost, we have developed the broadest set of state-of-the-art moulding technologies in the world of industrial machinery and vehicles. What's more, all our know-how is at your disposal.

Whatever your needs, from design to final production of complex plastic components, we can take on the challenge. Indeed, at Persico, the more complex the job the better.

Our mission is to help our customers design better quality heavy vehicles and equipment, with greater value added than the ones currently available. We work in open collaboration and full synergy with our customers' moulders to achieve the final objective: higher end-user satisfaction.

Organization

Persico Industrial can be viewed as a four-wheel drive heavy-duty vehicle.

The rear wheels represent the technological heart of Persico Industrial: our innovative, well-staffed engineering department, solidly grounded in advanced moulding technologies that can meet any of our customers' special requirements.

And the front wheels are Persico Industrial's team of skilled proactive business developers: our dedicated professionals who can build partnerships with OEM customers and moulders in order to provide added value to our partners' businesses and end customers.

In addition, Persico Industrial boasts a global supply chain. With our local sites in the world's largest industrial markets (EU, USA, South America and China), our customer support team is always close at hand.

Product

Persico's motto is "giving shape to your ideas". Our products and services - from co-design to mould and machinery manufacturing - are developed to meet our customers' specific needs.

We supply custom-built moulds and equipment for: Rotomoulding, SMC/Carbon SMC, RTM/HP RTM, GMT/LFT/LWRT, PCM, Autoclave steel open tools, Blow molding.

We're not just an ordinary mouldmaker. Our job starts with listening to you - our customer.

We offer tailored solutions for the manufacture of plastic components, drawing on Persico Group's forty years of know-how in state-of-the-art mould design for numerous industries: automotive, industrial, marine, aerospace, health-care and architecture.

1. Rotomoulding CNC aluminium rotomould and tractor roof.
2. SMC presses and tractor roof.

3. CNC-machined aluminium mould and blow-moulded under-bonnet sound absorption shield.
